

Chilliwack Zoom Teeth Whitening

ZOOM In-office bleaching can give you noticeable results in less than two hours of therapy! Utilizing a blend of photosensitive bleaching gels and specially designed ultraviolet lamps, ZOOM In-Office! bleaching works to expertly whiten your teeth. Discolouration brought on over many years may be easily eliminated with this treatment method. Certain practices that cause discoloration such as ingesting coffee, tea, red wine, along with smoking and chewing tobacco, as well as consuming certain pasta sauces and curries are no match for ZOOM whitening. Also, this remedy option has been proven to be safe and effective and lasts for a tremendous amount of time. A brighter, whiter smile can increase your confidence and self image and create memorable impressions on people.

A meticulous routine of dental hygiene practices like routine flossing and daily brushing in addition to regular dental cleaning will assist you to keep your smile as bright as possible. Outcomes will ultimately vary although as many as eight shades whiter may be achieved in just one visit.

Customized dental bleaching trays for home use are integrated in the take-home advanced bleaching kit. Additionally, syringes filled with bleaching gels as well as instructions will be furnished for you at home use. The oral trays stuffed with whitening gel can be used between half an hour to four hours per day and night for nearly 2 weeks. The whitening gel works by seeping into the tooth enamel pores and fosters a chemical reaction that loosens and breaks the staining compounds that have caused the discolouration. You can even anticipate a results making your teeth six shades whiter when working with this treatment technique over the span of seven-fourteen days of time.
